

STOP Dis-abling Children

Online workshop to understand how to
create conditions to enable children to be emotionally,
psychologically and physically healthy

15 16 17 January

7 to 8 PM IST

Contribution Rs 3000 (For Indians) \$75 (International)

Some questions to be held

From whom have the
children learned their
'disabled' behaviour?

Behavioural
modification for whom?
The adult or for the child?

Some **questions** to be held

Aren't children equipped
by life for a psychologically
healthy life?

Are we
providing a stress free,
anxiety free environment?

Some **questions** to be held

Can love and care be
replaced with toys, dolls
and pets?

Aren't most products for
our convenience rather
than the child's?

Contemplate on this

Do we like to be controlled? How would we react when our freedom is curtailed?

How will we respond if we are compelled to do what we don't like to do?

What subconscious messages are being conveyed when we compel, punish, discipline, teach, help, win etc....?

Have we lost our natural 'mothering' instinct? How are the illiterates looking after their children?

"With the explosion in behavioral difficulties (ADHD, OSD, PTSD, OSAD, AHD etc) learning disabilities and mental & physical health problems in children today, one wonders if the predominant culture of the modern world is responsible for this damage."

Children develop their behaviour in response to the conditions we provide.

Modernity blames the victims rather than addressing the root cause. It is a miracle that lots of children due to life's sheer endurance manage to escape the destruction that modernity is doing to them.

Unfortunately even the solutions that are being offered again and again seem to be working against the true nature of children as we are again and again imposing our distorted and market led understanding of life

The sign of a developed, civilised society can be measured by the conditions it provides to its most vulnerable members without making them aware of their vulnerability and helplessness

Explore with us what can we do to ourselves to make life better for us and our children
